NEW SOCIETY PUBLISHERS (www.newsociety.com), is an activist, solutions-oriented publisher focused on publishing books for a world of change. Our books offer tips, tools, and insights from leading experts in sustainable building, homesteading, climate change, environment, conscientious commerce, renewable energy, and more — positive solutions for troubled times.

Books so green you could eat them

We are committed to the highest environmental practices in the industry. We print all of our books and catalogues on 100% post-consumer recycled paper (100% old growth forest-free), processed chlorine-free, and printed with vegetable-based, low-VOC inks. These practices are measured through an Environmental Benefits statement (included in each book) detailing the number of trees, landfill space and water that have been saved. And New Society Publishers is committed to printing all of our books and catalogues in North America, not overseas. These costs are sometimes reflected in the prices of our books, but as always, we are committed to walking our talk. We also work to reduce our carbon footprint, and purchase carbon offsets based on an annual audit to ensure a carbon neutral footprint.

Employee Trust and a Certified B Corp

In addition to an innovative shareholder’s agreement that granted the Employee Trust one-third ownership of the company, New Society Publishers is a Certified B Corporation. As a company that has always had a mandate of a triple bottom line including people, the planet, and profits, these are exciting steps that model our vision. We care deeply about what we publish — our overall list continues to be widely admired and respected for its timeliness and quality — but also about how we do business.

Ride the $40 trillion wave of “clean money” changing the face of investment, business, and the world for good

The Clean Money Revolution
Reinventing Power, Purpose, and Capitalism

JOEL SOLOMON WITH TYEE BRIDGE

By 2050, $40 trillion will change hands in North America alone. From Boomers to Millennials, the largest intergenerational wealth transfer in history is underway and the ramifications will remake the world.

The dirty money of “business as usual” is on the brink, wedged between catastrophic climate change and the demographic tidal wave of Millennials pounding the consumer table for real change. These forces are transforming the very nature of capitalism into something different and powerful—towards a clean money revolution.

Joel Solomon, pioneering clean money investor and change agent, lays it on the line. The revolution is underway, the opportunities are everywhere, and the challenges and rewards are immense.

Part memoir of an inspiring thought leader’s journey from presidential campaigner to budding oceanographer to multi-millionaire investor, part insider’s guide to the businesses remaking the world, and part manifesto for a bright new future, The Clean Money Revolution explores this massive economic shift, and how you can ride the $40 trillion wave to create the new, ethical, and sustainable businesses that power local economies, restore ecosystems, and build social and financial equity.

A must-read for investors, aspiring business leaders, and entrepreneurs looking to align values with assets and chart a unique and profitable life course. The Clean Money Revolution is underway. Join it!

JOEL SOLOMON is Chairman of Renewal Funds, a $98 million mission venture capital firm. He has invested in over 100 early growth-stage companies in North America, delivering above market returns while catalyzing positive social and environmental change.

TYEE BRIDGE is a Vancouver-based writer whose work focuses on progressive change-makers, ecological issues, and the power of story. He has received four National Magazine Awards and seven Western Magazine Awards.
WE ALL WANT TO BE HAPPY. Yet as we consume ever more in a frantic bid for happiness, global warming worsens.

Alarmed by drastic changes now occurring in the Earth’s climate systems, the author, a climate scientist and suburban father of two, embarked on a journey to change his life and the world. He began by bicycling, growing food, meditating, and making other simple, fulfilling changes. Ultimately, he slashed his climate impact to under a tenth of the US average and became happier in the process.

Being the Change explores the connections between our individual daily actions and our collective predicament. It merges science, spirituality, and practical action to develop a satisfying and appropriate response to global warming.

Part one exposes our interconnected predicament: overpopulation, global warming, industrial agriculture, growth-addicted economics, a sold-out political system, and a mindset of separation from nature. It also includes a readable but authoritative overview of climate science. Part two offers a response at once obvious and unprecedented: mindfully opting out of this broken system and aligning our daily lives with the biosphere.

The core message is deeply optimistic: living without fossil fuels is not only possible, it can be better.

Peter Kalmus is an atmospheric scientist at Caltech / Jet Propulsion Laboratory with a Ph.D. in physics from Columbia University. He lives in suburban Altadena, California with his wife and two children on 1/10th the fossil fuels of the average American.
COMPLEMENTING THE BOOK Being the Change, this feature documentary film delves into the life of Caltech / Jet Propulsion Laboratory atmospheric scientist Peter Kalmus, showing how a change in life philosophy and mindframe enabled Kalmus to cut his fossil fuel use to 1/10th of the average American. All while boosting his happiness and raising a family in a typical California suburb.

In the film, Kalmus reveals how he stopped trying to convert climate change deniers with facts and figures and instead embarked upon a mission to become the change he wanted to see in the world. Along the way, Kalmus shows how he brought together his head (the science), his hands (food growing, bicycling, and lifestyle change), and heart (meditation and community building), to find new direction in his life.

Inspirational, hopeful, and doable by anyone, the message is clear: we can all change our minds and actions and live happier, more satisfying lives while reconnecting with our ourselves, our communities, and the biosphere that sustains us all. And in the process we might just spark a climate revolution that truly changes everything.

MARY GRANDELIS and DAVE DAVIS, producers of El Cap Report and Allegheny Stories, have been making films together for over 20 years. They produce, write, direct, edit, and score all of their work. Recently they made the decision to align their work with their personal values and beliefs, leading them to pursue projects that serve as tools to help create a more just, equitable, and sustainable society.
Throw off the shackles of formal schooling and embark upon a rich journey of self-directed, life-long learning

Dumbing Us Down
The Hidden Curriculum of Compulsory Schooling - 25th Anniversary Edition

JOHN GATTO
FOREWORD BY ZACHARY SLAYBACK

AFTER OVER 100 YEARS of mandatory schooling in the U.S., literacy rates have dropped, families are fragmented, learning “disabilities” are skyrocketing, and children and youth are increasingly disaffected. Thirty years of teaching in the public school system led John Taylor Gatto to the sad conclusion that compulsory governmental schooling is to blame, accomplishing little but to teach young people to follow orders like cogs in an industrial machine.

He became a fierce advocate of families and young people taking back education and learning, arguing that “genius is as common as dirt,” but that conventional schooling is driving out the natural curiosity and problem-solving skills we’re born with, replacing it with rule-following, fragmented time, and disillusionment.

Gatto’s radical treatise on public education, a New Society Publishers bestseller for 25 years, continues to bang the drum for an unshackling of children and learning from formal schooling. Now, in an ever-more-rapidly changing world with an explosion of alternative routes to learning, it’s poised to continue to shake the world of institutional education for many more years.

Featuring a new foreword from ZACHARY SLAYBACK, an Ivy League dropout and cofounder of tech start-up career foundry Praxis, this 25th anniversary edition will inspire new generations of parents and students to take control of learning and kickstart an empowered society of self-directed lifetime-learners.

JOHN TAYLOR GATTO has been a fierce advocate for self-directed “guerrilla” education for decades. He is also the author of Weapons of Mass Instruction and The Underground History of American Education.

*Available in Hardcover and Paperback.
FOOD RECALLS, DUBIOUS HEALTH CLAIMS, scary and shocking ingredients in health and beauty products. Our increasingly industrialized supply system is becoming more difficult to navigate, more frightening, and more frustrating, leaving us feeling stuck choosing in many cases between the lesser of several evils.

Author Deborah Niemann offers healthier, more empowering choices, by showing us how to reclaim links in our food and purchasing chains, to make choices that are healthier for our families, ourselves, and our planet. In this fully updated and revised edition of Homegrown and Handmade, Deborah shows how making things from scratch and growing some of your own food can help you eliminate artificial ingredients from your diet, reduce your carbon footprint, and create a more authentic life.

Whether your goal is increasing your self-reliance or becoming a full-fledged homesteader, it’s packed with answers and solutions to help you rediscover traditional skills, take control of your food from seed to plate, and much more.

This comprehensive guide to food and fiber from scratch proves that attitude and knowledge is more important than acreage. Written from the perspective of a successful, self-taught modern homesteader, this well-illustrated, practical, and accessible manual will appeal to anyone who dreams of a more empowered life.

DEBORAH NIEMANN presents and teaches extensively on topics ranging from soapmaking to livestock care. She and her family raise livestock for meat, eggs and dairy products, while an organic garden and orchard provide fruit and vegetables. Deborah is also the author of Raising Goats Naturally.
Put off by the origin-unknown, not-so-fresh, pesticide-laden offerings at the grocery store? Hungry for delicious high-quality veggies and fragrant herbs, and looking to have some control over where your food comes from, but never planted a seed in your life?

Foodie meets gardener in this deliciously accessible, easy-to-use guide to growing, cooking, and preserving twenty-some popular, easy-to-grow vegetables and herbs. Taking the budding gardener from planting, growing and harvesting, to preparation of delicious, nutritious, and affordable meals, this book is a celebration of food in all its stages.

The Food Lover’s Garden guides the reader through:

- Getting started with easy step-by-step growing instructions from balcony to backyard
- Simple, tasty recipes incorporating each vegetable and herb
- Meal combinations of two or more of the featured dishes
- Selecting essential kitchen tools and gadgets to maximize the harvest
- Canning and pickling recipes to preserve the rest

Perfect for the foodie and budding gardener—from the humble potato, to pungent garlic, to the beauty of the beet, classic staples take a delicious turn with novel, innovative recipes. Truly food for all seasons and palates.

Foodies, new gardeners, urban homesteaders, and supporters of sustainable living—take back your right to high-quality food with The Food Lover’s Garden.

Jenni Blackmore is a writer, painter, micro-farmer, and certified Permaculture Design Consultant. Her most recent book Permaculture for the Rest of Us follows her journey from industrial Manchester to Quackadoodle Farm, a sustainable homestead in Nova Scotia.
Make your own real, non-dairy cheese at home—traditional methods for making plant-based cheese

The Art of Plant-Based Cheesemaking

How to Craft Real, Cultured, Non-Dairy Cheese

KAREN MCATHY

As plant-based, dairy-free diets continue to expand in popularity for health and ethical reasons, cheese often becomes the “last hurdle.” Much of what passes for non-dairy “cheese” lacks the quality and depth of authentic, cultured cheese. Yet for aspiring DIY plant-based cheesemakers, much of the knowledge of this new craft is scattered in isolated kitchens, and there’s no real reliable guidance to what works, what doesn’t, and why, when making real, cultured plant-based cheese. This book aims to change all that and bring this new craft into the kitchens of the world.

Written by a pioneering plant-based cheesemaker who draws deep from the well of experience, The Art of Plant-based Cheesemaking is a clear, highly practical guide that extends traditional cheesemaking methods into the realm of plant-based media as a substitute for dairy.

Coverage includes:

• Understanding culturing and fermentation
• Essential ingredients and equipment for crafting plant-based cheese
• Plant and nut-based media and how to make them
• Delicious recipes for quick cheeses
• Advanced recipes for cultured and aged cheeses
• Resources for sourcing equipment and cultures.

Packed with step-by-step recipes, straightforward processes, and encouraging experimentation, this book makes plant-based cheesemaking accessible for beginners and serious foodies alike. Simply everything you need to make delicious non-dairy cheese right at home.

KAREN MCATHY is the Chef and Founder of Blue Heron Creamery in Vancouver, BC, which creates and supplies authentic cultured plant-based cheeses to restaurants, retail outlets, and private customers. She is formerly the Executive Chef of vegan restaurants, Graze Vegetarian and Zend Conscious Lounge in Vancouver, BC.
Increasingly, we want to know where our food comes from, who grows it and how it is grown, and interest in permaculture, backyard composting, and gardening in general, is growing. So how does the budding gardener ensure that the soil is healthy and nutrient-rich enough to support growing some great food? One answer — worms! Vermiculture is the healthiest and most cost-effective way to ensure that your soil receives the nourishment that it needs. A simple vermicompost bin can produce completely natural, nutrient-rich fertilizer that can be used to boost soil health and, in turn, increase crop yield.

In true Crystal Stevens’ fashion, Worms at Work is a practical, easy-to-implement guide to fertilizing and enriching your garden naturally. It discusses the vital role worms play in boosting soil health, and the reasons why every gardener should use vermicompost in order to decrease reliance on toxic synthetic fertilizers. Covering simple designs for building your own vermicompost bin, whether for a small backyard garden or for a larger farm or homestead, to the care and feeding of worms and how to use worm castings in the garden, Worms at Work will help you put YOUR worms to work to grow happy, healthy plants in happy, healthy soil.

CRYSTAL STEVENS is an herbalist, writer, artist, and vegetable farmer. Together with her husband Eric, Crystal co-managed La Vista Farm, a CSA serving 150 families, for seven years. They live along the bluffs of the Mississippi River in Godfrey, IL with their two children. Crystal is also the author of Grow Create Inspire.

TYTICAL BACKYARD PONDS are a complicated mess of pipes, pumps, filters, and nasty chemicals designed to adjust pH and keep algae at bay. Hardly the bucolic, natural ecosystem beloved by dragonflies, frogs, and songbirds.

The antidote is a natural pond, free of hassle, cost, and complexity and designed as a fully functional ecosystem, ideal for biodiversity, swimming, irrigation, and quiet contemplation.

Building Natural Ponds is the first step-by-step guide to designing and building natural ponds that use no pumps, filters, chemicals, or electricity and mimic native ponds in both aesthetics and functionality. Highly illustrated with how-to drawings and photographs, coverage includes:

- Understanding pond ecosystems and natural algae control
- Planning, design, siting, and pond aesthetics
- Step-by-step guidance for construction, plants and fish, and maintenance and troubleshooting
- Scaling up to large ponds, pools, bogs, and rain gardens.

Whether you’re a backyard gardener looking to add a small serene natural water feature or a homesteader with visions of a large pond for fish, swimming, and irrigation, Building Natural Ponds is the complete guide to building ponds in tune with nature, where plants, insects, and amphibians thrive in blissful serenity.

ROBERT PAVLIS, a Master Gardener with over 40 years of gardening experience, is owner and developer of Aspen Grove Gardens, a six-acre botanical garden featuring over 2,500 varieties of plants. A well-respected speaker and teacher, Robert has published articles in Mother Earth News, Ontario Gardening magazine, the widely read blog GardenMyths.com, which explodes common gardening myths, and gardening information site GardenFundamentals.com.
light Straw clay – straw mixed with clay slip – is a versatile, easy-to-use wall-building material. Also called “slip-straw,” its durability has been proven in beautiful, centuries-old buildings across Northern Europe and in modern high-performance buildings in North America.

Building-code compliant in the US and using “waste” materials with high insulation value and excellent moisture handling qualities, it’s both high-performance and low-impact. Yet until now, there has been no practical guide to using the material in a wide variety of construction and renovation projects.

Distilling decades of experience, Essential Light Straw Clay Construction is a fully illustrated step-by-step guide, ideal for both the DIYer and professional designer and builder alike. It covers:

- Material specifications, performance, and when and where to use it
- Estimating quantities, costs, and sourcing
- Illustrated, step-by-step guidance for mixing and installation, including “slip-chip” variations
- Detail drawings for various wall systems including stud, timber, and pole framing, Larsen trusses, I-joists, plus retrofits
- Code references, compliance, and best practice
- Finishing and maintenance techniques
- Additional resources.

LYDIA DOLEMAN, a licenced contractor, taught carpentry and natural building at Solar Energy International in Colorado and was lead ecological builder for Portland’s City Repair project. She’s created beautiful, high-performance, low-impact buildings across the Northwest, including Portland’s first permitted straw bale home. She’s written for The Last Straw Journal and Permaculture Activist and appeared on NBC News and HGTV’s Off Beat America. Lydia lives in southern Oregon.

**Design your own sustainable home**

**Essential Sustainable Home Design**

* A Complete Guide to Goals, Options, and the Design Process

**CHRIS MAGWOOD**

*Many people dream* of building a beautiful, environmentally friendly home. But until now there has been no systematic guide to help potential builders work through the complete process of imagining, planning, designing, and building their ideal, sustainable home.

*Essential Sustainable Home Design* walks potential homebuilders through the process starting with key concepts, principles, and a project vision that will guide the house to completion.

Coverage includes:

- How to clarify your ideas and create a practical pathway to achieving your dream
- A criteria matrix to guide design, material, and systems decisions
- Creating a strong, integrated design team and working with professionals and code officials
- Key building science concepts that make for a high-performance, durable building
- A primer on building logistics, material sourcing, and protocols to take the vision for the project to fruition
- One-page summaries and ratings of popular sustainable building materials and system options.

Ideal for owner-builders and sustainable building contractors working with clients aiming to design and build a sustainable home.

**CHRIS MAGWOOD** has designed and built some of the most innovative, sustainable buildings in North America, including the first off-grid, straw bale home in Ontario. He is co-founder and director the Endeavour Centre for Innovative Building and Living and co-editor of the Sustainable Building Essentials series. Chris is the author of *Essential Prefab Straw Bale Construction*, *Essential Hempcrete Construction*, *More Straw Bale Building*, and *Making Better Buildings*. 
The completely revised and updated comprehensive guide to small wind energy systems

Power from the Wind – Revised 2nd Edition

A Practical Guide to Small Scale Energy Production

DAN CHIRAS

Skyrocketing energy costs and constant reminders of the impacts of conventional energy sources are making homeowners and businesses look at different ways to use energy more efficiently and to generate their own electricity to reduce fuel bills and their carbon footprint.

Power From the Wind is the completely revised and updated edition of the go-to guide for individuals and businesses interested in installing small wind energy systems. Written for the layperson, this practical guide provides an accurate and unbiased view of all aspects of small wind energy systems, including:

- Wind and wind energy system options
- Ways to assess wind resources at your site
- Wind turbines and towers
- Inverters and batteries
- Installation and maintenance of systems
- Costs and benefits of installing a wind system

Readers will gain the knowledge they need to make wise decisions during the design, purchase, and installation of small wind energy systems and to communicate effectively with wind system installers, and will be empowered to help make the smartest, most economical choices.

Dan Chiras is an internationally acclaimed author who has published over 30 books, including The Homeowner’s Guide to Renewable Energy and Power from the Sun. He is a certified wind site assessor and has installed several residential wind systems. He is Founder and Director of The Evergreen Institute, which offers workshops on residential renewable energy and green building.

Positive Solutions for Troubled Times

New Society Publishers’ mission is to publish books that contribute in fundamental ways to building an ecologically sustainable and just society, and to do so with the least possible impact upon the environment, in a manner that models that vision.
